

The error in main code was in line:

pirate.strewHat(Crew[2]); // this line is the same as

pirate.strewHat(Crew[2]); // the compiler will look for a default ctor to

initialize the strewHat(Crew[2]) and strewHat(Crew[2]) but because

in pirate.h there is a ctor with parameter the compiler doesn't

create a default ctor, so it doesn't find a suitable ctor.

```
shamdak@PC:~/mnt/c/users/HP/Downloads/matam_hw2$ g++ -std=c++17 -Wall -Werror -pedantic dry/main.cpp dry/Pirate.cpp -o pirate
shamdak@PC:~/mnt/c/users/HP/Downloads/matam_hw2$ ./pirate
Straw Hat crew contains:
Luffy (Bounty: 1000000, Devil Fruit: Gum Gum)
Zoro (Bounty: 5000000, Devil Fruit: None)
shamdak@PC:~/mnt/c/users/HP/Downloads/matam_hw2$
```
